Art.90 - CUTTING LINE 1000/1500 mm

The modularity of the system enables the selection of various solutions to correctly meet customer needs, and covers an entire range of automatic sheeting production types. The absolute simplicity and ergonomic features of the equipment eases operator tasks (settings and control), while all the calculations are sent for control.

All processes start from the belt and each movement is automatically controlled. The sheeting varies in thickness from 0,5 mm to 1,5 mm stainless steel.

Configuration composed of:

- Decoiler; manual expansion of mandrel; adjustable brake ,capacity 6000 Kg; internal diameter. of coil min. 400/550 mm.
- Sheeting input guide with manual regulation on steel plates, processed and milled on work stations;

- Straightening machine unit with 4 chromed rollers, 90 mm diameter, coupled with driving rollers in rubberised Vulkolan, 100 mm diameter, gear transmission, line movement measuring device with wheel and encoder;
- Electrical shears :
 - useful light 1050 (1550) mm;
 - max. thickness 2 mm galvanized , 1.25 mm inox.
- Control panel, piece positioning device and quantity, management software;
 - Processing speed 20 mt. Per minute.;
 - Precision control + / - 0,2 mm;

Electrica connections and power suppli:
380 V 3 phases + earth 50Hz , 2Kw
